THE JOURNAL

OF THE

ROYAL AERONAUTICAL SOCIETY

with which is incorporated The Institution of Aeronautical Engineers

INDEX TO VOL. XLIII.

ACCIDENTS

Aircraft Accidents and Casualties in the U.S.A. for the Period 1928-37 (Abstract from *Aeroplane*, 31/5/39), *J.*, XLIII., p. 551.

ACOUSTICS

Measurements and Analysis of Noise and Vibration (Abstract from *Instruments*, Aug., 1939), *J.*, XLIII., p. 934.

The Audibility of Warning Sirens in the Presence of Street Noises (Abstract from *Comp. Rend.*, 30/5/39), *J.*, XLIII., p. 630.

The Degenerative Sound Analyser (Abstract from *J.A.S.A.*, Oct., 1939), *J.*, XLIII., p. 1013.

A New Apparatus for Direct Reading of Pitch and Intensity of Sound and Its Application (Abstract from *Electrotechnical Journal*, July, 1939), *J.*, XLIII., p. 1013.

A Sound Pitch Indicator, Incorporating the Thyratron (Abstract from *J. Sci. I.*, Oct., 1939), *J.*, XLIII., p. 1013.

The True Velocity of Sound in Air (Abstract from *Ann. d. Physik*, April, 1939), *J.*, XLIII., p. 386.

AERODYNAMICS, *see* also Aerofoils; Hydrodynamics.

The Accurate Measurements of Static and Dynamic Pressure (Abstract from *L.F.F.*, 10/12/38), *J.*, XLIII., p. 109.

An Analytical Method for Solving the Problems of Flow Around a Curved Arc with Breakaway of the Jet (Abstract from *C.A.H.I.* (*Moscow*) No. 354), *J.*, XLIII., p. 229.

The Approximate Prediction of Skin Friction and Lift (Abstract from *Phil. Mag.*, Nov., 1938), *J.*, XLIII., p. 37.

The Compressibility Burble and the Effect of Compressibility on Pressures and Forces Acting on an Aerofoil (Abstract from *N.A.C.A. Report* No. 646), *J.*, XLIII., p. 474.

Eddy Diffusion (Abstract from *Ind. and Eng. Chem.*, April, 1939), *J.*, XLIII., p. 472.

Edge Resistance of Blade Rows (Abstract from *Forschung*, Vol. 9, No. 4), *J.*, XLIII., p. 36.

Effect of Shock Waves (Abstract from *J. Aeron. Sci.*, May, 1939), *J.*, XLIII., p. 549.

Effect of Engine Nacelles and Undercarriage on the Characteristics of a Thick Monoplane Wing (Abstract from *Trans. C.A.H.I.*, No. 259), *J.*, XLIII., p. 915.

Effect of Proximity of the Ground on the Aerodynamical Characteristics of a Aeroplane (Abstract from *Trans. C.A.H.I.*, No. 267), *J.*, XLIII., p. 913.

The Effect of some Common Surface Irregularities on Wing Drag (Abstract from *N.A.C.A. Tech. Note* No. 695), *J.*, XLIII., p. 475.

The Effects of Surface Waviness and of Rib Stitching on Wing Drag (Abstract from *N.A.C.A. Tech. Note* No. 724), *J.*, XLIII., p. 914.

Experimental Aerodynamics (Abstract from *Bull. des Services Techniques*, Nos. 83, 83a, 1938), *J.*, XLIII., p. 314.

Experimental Research in the Guidonia Supersonic Wind Tunnel, by Lt. A. Ferri, *J.*, XLIII., p. 803, corrections pp. 834.

The Growth of the Circulation of an Aerofoil Flying through a Gust (Abstract from *J. Aeron. Sci.*, July, 1939), *J.*, XLIII., p. 718.

Instructional Films on the Subject of Conformal Representation (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 244.

Investigation of the Lift Distribution over the Separate Wings of a Biplane (Abstract from *L.F.F.*, 10/10/38), *J.*, XLIII., p. 475.

Laminar Friction Resistance with Pressure Gradient (Abstract from *J. Aeron. Sci.*, Oct., 1939), *J.*, XLIII., p. 996.

Large Wind Power Generating Plants (Abstract from *E.T.Z.*, 22/12/38), *J.*, XLIII., p. 123.

Large Wind Power Generators (Abstract from *Metro. Vickers Tech. News Bulletin* No. 652), *J.*, XLIII., p. 373.

On a Limiting Case of the Dimensional Unsteady Flow Round a Wing (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 231.

A Method of Rapidly Estimating the Position of the Laminar Separation Point (Abstract from *N.A.C.A. Tech. Note* No. 671), *J.*, XLIII., p. 37.

The Moment of the Fluid Pressure Acting on a Flat Plate in a Stream between Two Parallel Walls and Some Allied Problems (Abstract from *Aer. Res. Inst., Tokio,* No. 170), *J.*, XLIII., p. 108.

New Methods of Calculation for Ventilators and Blowers of the Radial Type (Abstract from *Schweizer Bauzeitung*, 28/1/39), *J.*, XLIII., p. 632.

The Photography of Airscrew Sound Waves (Abstract from *Proc. Roy. Soc.*, Series A, Vol. 169, No. 937), *J.*, XLIII., p. 121.

Propulsion and Resistance (Abstract from *Z.A.M.M.*, April, 1939), *J.*, XLIII., p. 476.

Reduction of Skin Friction on a Flat Plate through Boundary Layer Control (Abstract from *J. Aeron. Sci.*, May, 1939), *J.*, XLIII., p. 549.

On the Stability of Vortex Sheets (Abstract from *C.A.H.I.* (*Moscow*) No. 304, 1937), *J.*, XLIII., p. 227.

Supersonic Flow Over an Inclined Body of Revolution (Abstract from *J. Aer. Sci.*, Oct., 1938), *J.*, XLIII., p. 38.

On the Theory of Vortex Motion (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 232.

Uniform Motion of a Sphere or a Cylinder through a Viscous Fluid (Abstract from *Phil. Mag.*, Feb., 1939), *J.*, XLIII., p. 314.

Vaneless Diffusors (Abstract from *C.A.H.I. Report* No. 305), *J.*, XLIII., p. 315.

Variation in Velocity Profile with Change in Surface Roughness of Boundary (Abstract from *Z.A.M.M.*, April, 1939), *J.*, XLIII., p. 476.

Wind Tunnel Measurements on Flat and Slightly Cambered Circular Plates (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 233.

AERODYNAMICS—BOUNDARY LAYER

Air Flow in the Boundary Layer of an Elliptic Cylinder (Abstract from *N.A.C.A. Tech. Report* No. 652), *J.*, XLIII., p. 632.

Approximate Integration of the Equation for the Boundary Layer by the Methods Employed in the Theory of Heat Transfer (Abstract from *Proc. Joukovsky Academy of Military Aeronautics*, 1935, No. 13), *J.*, XLIII., p. 230.

Comparison of Profile Drag and Boundary Layer Measurements Obtained in Flight and in the Full-Scale Wind Tunnel (Abstract from *N.A.C.A. Tech. Note* No. 693), *J.*, XLIII., p. 475.

The Correlation of Boundary Layer Transition Data (Abstract from *J. Aeron. Sci.*, March, 1939), *J.*, XLIII., p. 373.

Determination of Boundary Layer Transition on Three Symmetrical Aerofoils in the N.A.C.A. Full-Scale Wind Tunnel (Abstract from *N.A.C.A. Report* No. 637), *J.*, XLIII., p. 474.

Effect of Profile Form on Frictional Resistance. Investigation of the Turbulent Boundary Layer in the Region of Breakaway (Abstract from *C.A.H.I.* (*Moscow*) No. 333), *J.*, XLIII., p. 229.

Further Development of a Boundary Layer Profile with a Given Pressure Distribution (Abstract from *Z.A.M.M.*, June, 1939), *J.*, XLIII., p. 631.

On the Transition from Laminar to Turbulent Flow in the Boundary Layer of a Sphere (Abstract from *Aer. Res. Inst. Report, Tokio,* No. 167), *J.*, XLIII., p. 227.

Turbulence in the Boundary Layer (Abstract from *J. Aeron. Sci.*, Jan., 1939), *J.*, XLIII., p. 373.

Turbulent Boundary Layer of an Aerofoil. Part II. On the Resistance Law (Abstract from *C.A.H.I.* (*Moscow*) No. 316, 1937), *J.*, XLIII., p. 228.

Turbulent Friction in the Boundary Layer of a Flat Plate in a Two-Dimensional Flow of Compressible Gas at High Speeds (Abstract from *C.A.H.I.* (*Moscow*) No. 321, 1937), *J.*, XLIII., p. 228.

Universal Logarithmic Law of Velocity Distribution as Applied to the Investigations of Boundary Layer and Drag of Streamline Bodies at Large Reynolds Number (Abstract from *Trans. C.A.H.I.* No. 257), *J.*, XLIII., p. 912.

AERODYNAMICS—TURBULENCE

The Calculation of Turbulent Separation of Flow (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 232.

The Consideration of the Viscosity Effect in the Kármán Turbulence Theory (Abstract from *C.A.H.I.* (*Moscow*) No. 322), *J.*, XLIII., p. 229.

Effect of a Screen Grid on the Turbulence of an Air Stream (Abstract from *Ind. and Eng. Chem.*, April, 1939), *J.*, XLIII., p. 473.

Frequency Analysis of Turbulent Velocity Variations (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 232.

Laws of Turbulent Flow in Open Channels (Abstract from *Bur. Stan. J. Res.*, Dec., 1938), *J.*, XLIII., p. 233

On the Measurement of Longitudinal and Lateral Velocity Variations in Turbulent Flow (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 232.

Turbulence and Diffusion (Abstract from *Ind. and Eng. Chem.*, April, 1939), *J.*, XLIII., p. 472.

AEROFOILS

D.2 Aerofoil Series (Abstract from *Trans. C.A.H.I.* No. 264), *J.*, XLIII., p. 912.

Circulation Measurements About the Tip of an Aerofoil during Flight through a Gust (Abstract from *N.A.C.A. Tech. Note* No. 685), *J.*, XLIII., p. 372.

Experimental Investigation of the Momentum Method for Determining Profile Drag (Abstract from *N.A.C.A. Tech. Report* No. 660), *J.*, XLIII., p. 718.

Flow Observations with Tufts and Lampblack of the Stalling of Four Typical Aerofoil Sections in the N.A.C.A. Variable Density Tunnel (Abstract from *N.A.C.A. Tech. Note* No. 672), *J.*, XLIII., p. 37.

Forces and Moments on a Yawed Aerofoil (Abstract from *L.F.F.*, 20/4/39), *J.*, XLIII., p. 995.

The Lift and Drag of a Rectangular Wing Spanning a Free Jet (Abstract from *Phil. Mag.*, Feb., 1939), *J.*, XLIII., p. 314.

Lift Distribution on Wings Fitted with Lateral Disks (Abstract from *L.F.F.*, 20/5/39), *J.*, XLIII., p. 632.

A Non-Linear Wing Theory and Its Application to Rectangular Wings of Small Aspect Ratio (Abstract from *Z.A.M.M.*, Feb., 1939), *J.*, XLIII., p. 316.

A Simplified Method for the Calculation of Aerofoil Pressure Distribution (Abstract from *N.A.C.A. Tech. Note* No. 708), *J.*, XLIII., p. 553.

A Summary of N.A.C.A. Investigations on High Lift Devices (Abstract from *J.S.A.E.*, Feb., 1939), *J.*, XLIII., p. 317.

Tests of N.A.C.A. 0009, 0012 and 0018 Aerofoils in the Full-Scale Tunnel (Abstract from *N.A.C.A. Report* No. 647), *J.*, XLIII., p. 373.

The Unsteady Flow of a Finite Wing (Abstract from *N.A.C.A. Tech. Note* No. 682), *J.*, XLIII., p. 314.

The Vortex Resistance of Theoretical Profiles (Abstract from *C.A.H.I. Report* No. 317), *J.*, XLIII., p. 315.

AEROFOILS—AILERONS

A Flight Comparison of Conventional Ailerons on a Rectangular Wing and of Conventional and Floating Wing Tip Ailerons on a Tapered Wing (Abstract from *N.A.C.A. Report*, 1938), *J.*, XLIII., p. 316.

Flight Tests of Retractable Ailerons on a Highly Tapered Wing (Abstract from *N.A.C.A. Tech. Note* No. 714), *J.*, XLIII., p. 720.

AEROFOILS—FLAPS

Calculation of the Chordwise Load Distribution over Aerofoil with Sections with Plain, Split or Serially Hinged Trailing Edge Flaps (Abstract from *N.A.C.A. Report* No. 634), *J.*, XLIII., p. 36.

Characteristics of a Deflector Plate Flap (Abstract from *Autom. Ind.*, Vol. 80, 21/1/39), *J.*, XLIII., p. 236.

Downwash and Wake Behind Plain and Flapped Aerofoils (Abstract from *N.A.C.A. Report* No. 651), *J.*, XLIII., p. 474.

The Effects of Partial Span Slotted Flaps on the Aerodynamic Characteristics of a Rectangular and a Tapered N.A.C.A. 23012 Wing (Abstract from *N.A.C.A. Tech. Note* No. 719), *J.*, XLIII., p. 722.

The Grant Streamline Flap (Abstract from *J. Aeron. Sci.*, Oct., 1939), *J.*, XLIII., p. 998.

Pressure Distribution Measurements on a Tapered Wing with a Full Span Split Flap in Curved Flight (Abstract from *N.A.C.A. Tech. Note* No. 683), *J.*, XLIII., p. 316.

Résumé of Air Load Data on Slats and Flaps (Abstract from *N.A.C.A. Tech. Note* No. 690), *J.*, XLIII., p. 477.

Summary of N.A.C.A. Investigations of High Lift Devices (Abstract from *J.S.A.E.*, April, 1939), *J.*, XLIII., p. 473.

Tests of an N.A.C.A. 23012 Aerofoil with a Slotted Deflector Flap (Abstract from *N.A.C.A. Tech. Note* No. 609), *J.*, XLIII., p. 551.

Wind Tunnel Investigation of Ground Effect on Wings with Flaps (Abstract from *N.A.C.A. Tech. Note* No. 705), *J.*, XLIII., p. 551.

Wind Tunnel Investigation of an N.A.C.A. 23012 Aerofoil with Two Arrangements of a Wide Chord Slotted Flap (Abstract from *N.A.C.A. Tech. Note* No. 715, June, 1939), *J.*, XLIII., p. 720.

Wind Tunnel Investigation of an N.A.C.A. 23,021 Aerofoil with Two Arrangements of a 40 per cent. Chord Slotted Flap (Abstract from *N.A.C.A. Tech. Note* No. 728), *J.*, XLIII., p. 997.

Wind Tunnel Tests of Several Forms of Fixed Wing Slot in Combination with a Slotted Flap on an N.A.C.A. 23012 Aerofoil (Abstract from *N.A.C.A. Tech. Note* No. 702), *J.*, XLIII., p. 551.

AEROFOILS—SLOTS

The Effect of Fixed Wing Slots on the Stall Characteristics of a Modern Bi-Motor Aeroplane (Abstract from *J. Aeron. Sci.*, Sept., 1939), *J.*, XLIII., p. 917.

Flight Tests of N.A.C.A. Nose-Slot Cowlings on the BFC-I Aeroplane (Abstract from *N.A.C.A. Tech. Note* No. 720), *J.*, XLIII., p. 914.

AERONAUTICS

The Future of Flying, by H. E. Wimperis, C.B., C.B.E., F.R.Ae.S., *J.*, XLIII., p. 875.

AEROPLANES

An Experimental Investigation on the Normal Acceleration of an Aeroplane Model in a Gust (Abstract from *N.A.C.A. Tech. Note* No. 786), *J.*, XLIII., p. 553.

The Landing of Aeroplanes on Ice (Abstract from *Air Fleet News, U.S.S.R.*, Dec., 1938), *J.*, XLIII., p. 550.

Makhonine Variable Wing Aircraft (Abstract from *Inter. Avia.*, 21/7/39), *J.*, XLIII., p. 720.

Pressure Cabin Investigations (Phase I) (Abstract from *A.C.I.C.*, 1/10/37), *J.*, XLIII., p. 318.

AEROPLANES—CONTROL

The Controlled Curvilinear Horizontal Flight of an Aircraft (Abstract from *Ing. Arch.*, Oct., 1938), *J.*, XLIII., p. 377.

The Determination of the Product of Inertia of Aircraft Control Surfaces (Abstract from *A.C.I.C.* No. 711), *J.*, XLIII., p. 375.

The Flying Controls of the Aeroplane, by G. T. R. Hill, M.C., M.Sc., M.I.Mech.E., F.R.Ae.S., *J.*, XLIII., p. 411.

The Importance of Automatic Steering in Aircraft Design (Abstract from *Lilienthal Soc.*, 1938), *J.*, XLIII., p. 322.

The Principle and Constituent Elements of Automatic Steering Apparatus for Aircraft (Abstract from *Lilienthal Soc.*, 1938), *J.*, XLIII., p. 321.

Some Recent Work on the Problem of Automatic Control (Abstract from *Lilienthal Soc.*, 1938), *J.*, XLIII., p. 321.

Theory of Automatic Control of Aeroplanes (Abstract from *N.A.C.A. Tech. Note* No. 700), *J.*, XLIII., p. 550.

AEROPLANES—DESIGN AND CONSTRUCTION

Design and Shop Problems in High Pressure Hydraulic Systems on Aircraft (Abstract from *J.S.A.E.*, Nov., 1939), *J.*, XLIII., p. 998.

Estimation of Wing Weights (Abstract from *J. Aer. Sci.*, Oct., 1938), *J.*, XLIII., p. 40.

Metal Aircraft Construction (Abstract from book by C. W. Vogelsang), *J.*, XLIII., p. 374.

Towards a Rational Method of Tail Plane Design (Abstract from *J. Aeron. Sci.*, July, 1939), *J.*, XLIII., p. 722.

Trans-Atlantic Aeroplane Design (Abstract from *J.S.A.E.*, Nov., 1939), *J.*, XLIII., p. 998.

The Use of Model Data in Aeroplane Design, by F. B. Bradfield and D. L. Ellis, *J.*, XLIII., p. 575.

AEROPLANES—MILITARY

Aerial Rearmament in the U.S.A.—Estimated Cost of Some Aircraft Types (Abstract from *Inter. Avia.*, 28/2/39), *J.*, XLIII., p. 312.

The Air Force of the U.S.S.R. (Abstract from *L'Air*, 1/7/39), *J.*, XLIII., p. 630.

The Air Power of Germany (Abstract from *Inter. Avia.*, 12/4/39), *J.*, XLIII., p. 469.

Comparison of French and German Air Power (Abstract from *Inter. Avia.*, 17/12/38), *J.*, XLIII., p. 106.

Development Trends in the Design of Fighter Aircraft (Abstract from *Inter. Avia.*, No. 642, 9/5/39), *J.*, XLIII., p. 471.

Organisation of the Italian Air Force (Abstract from *Luftwehr*, Oct., 1938), *J.*, XLIII., p. 36.

Tendencies and Aims of Italian Aviation (Abstract from *Les Ailes*, 20/7/39), *J.*, XLIII., p. 717.

AEROPLANES—MODEL TESTS

Static and Dynamic Model Similarity (Abstract from *J. Aeron. Sci.*, Sept., 1939), *J.*, XLIII., p. 927.

AEROPLANES—PERFORMANCE

On the Correction to be Applied to the Measured Take-off Run so as to Eliminate Differences Due to Pilotage (Abstract from *Aer. Res. Inst., Tokio*, Report No. 169), *J.*, XLIII., p. 39.

Effect of Wing Load, Aspect Ratio and Load Distribution Along the Span on the Flight Performance (Abstract from *L.F.F.*, 20/5/39), *J.*, XLIII., p. 633.

Flight Tests on the Range of the Kôken Long-Range Monoplane (Abstract from *Aero. Res. Inst., Tokio*, Report No. 175), *J.*, XLIII., p. 719.

General Aeroplane Performance (Abstract from *N.A.C.A. Tech. Report* No. 654), *J.*, XLIII., p. 634.

Increase in the Speed of Aircraft during Recent Times (Abstract from *Lilienthal Society Meeting*, Oct., 12th, 1938), *J.*, XLIII., p. 41.

Investigations on the Safety of the Take-off of Aeroplanes in Connection with the Qualities of the Aeroplane, 1938, *J.*, XLIII., p. 673.

A Method for the Photographic Recording of Take-off and Landing Performance, by J. B. Douglas, B.A.Sc., A.F.R.Ae.S., and J. B. Mills, B.Sc., B.E., Grad.R.Ae.S., *J.*, XLIII., p. 441.

Some Details on the Italian Altitude Record (Abstract from *Les Ailes*, 24/11/38), *J.*, XLIII., p. 40.

Some Fundamental Considerations in Regard to the Use of Power in Landing an Aeroplane (Abstract from *N.A.C.A. Tech. Note* No. 692), *J.*, XLIII., p. 478.

Some Notes on the Measurement of the Flying Qualities of Aircraft (Abstract from *Istus Congress, Bern*, 1938), *J.*, XLIII., p. 112.

AEROPLANES—PRODUCTION

Accelerated Aircraft Production for National Defence (Abstract from *J.S.A.E.*, Nov., 1939), *J.*, XLIII., p. 1011.

American Methods of Aircraft Production, by T. P. Wright, F.I.Ae.S., F.R.Ae.S., *J.*, XLIII., p. 131.

Co-Ordinating Aircraft Design and Production (Abstract from *J.S.A.E.*, Feb., 1939), *J.*, XLIII., p. 319.

Interchangeability in Modern Aircraft Production (Abstract from *J.S.A.E.*, Nov., 1939), *J.*, XLIII., p. 1010.

Methods of Aircraft Production in U.S.A. (Abstract from *Airc. Eng.*, Dec., 1938), *J.*, XLIII., p. 40.

Modern Manufacturing Equipment of the Ernst Heinkel Aeroplane Works (Abstract from *L.F.F.*, Jan., 1938), *J.*, XLIII., p. 241.

New Method of Developing Prototype Aeroplanes as Applied to Consolidated Model 31 (Abstract from *J.A.S.E.*, Nov., 1939), *J.*, XLIII., p. 1011.

The Final Assembly of Aircraft (Abstract from *J.S.A.E.*, Nov., 1939), *J.*, XLIII., p. 1011.

AEROPLANES—STABILITY

Aerodynamic Principles of Automatic Stabilisers (Abstract from *Proc. Lilienthal Soc.*, Oct., 1938), *J.*, XLIII., p. 550.

An Approximate Spin Design Criterion for Monoplanes (Abstract from *N.A.C.A. Tech. Note* No. 711), *J.*, XLIII., p. 633.

A Comparison of Several Tapered Wings Designed to Avoid Tip Stalling (Abstract from *N.A.C.A. Tech. Note* No. 713), *J.*, XLIII., p. 635.

Downwash at Tail Surface Taking into Account the Mutual Interaction of Propeller and Wing (Abstract from *C.A.H.I. Report* No. 315), *J.*, XLIII., p. 315.

Downwash at the Tail Surfaces of an Aeroplane with a Wing of an Arbitrary Plan Form (Abstract from *C.A.H.I. Report* No. 312), *J.*, XLIII., p. 313.

Effect of the Shape of a Wing on the Load Distribution Along the Span and on the Longitudinal Stability (Abstract from *C.A.H.I. (Moscow)* No. 335), *J.*, XLIII., p. 234.

Empennage Design with Single and Multiple Vertical Surfaces (Abstract from *J. Aeron. Sci.*, July, 1939), *J.*, XLIII., p. 721.

The Influence of Lateral Stability on Disturbed Motions of an Aeroplane with Special Reference to the Motions Produced by Gusts (Abstract from *N.A.C.A. Report* No. 638), *J.*, XLIII., p. 38.

Lateral Stability of Aeroplanes at Unsymmetrical Propeller Thrust (Abstract from *C.A.H.I. Report* No. 318 (*Moscow*), *J.*, XLIII., p. 233.

N.P.L. Researches on the Stability of Aircraft (Abstract from *Engineering*, 4/11/38), *J.*, XLIII., p. 235.

Study of Recovery from Spin (Abstract from *J. Aeron. Sci.*, May, 1939), *J.*, XLIII., p. 553.

Testing Stability and Control of Aeroplanes, by A. G. von Baumhauer, *J.*, XLIII., p. 334.

Theoretical Stability and Control Characteristics of Wings with Various Amounts of Taper and Twist (Abstract from *N.A.C.A. Report* No. 635), *J.*, XLIII., p. 108.

Wind Tunnel Investigations of Aeroplane Spin, taking into Account the Radius of the Trajectory (Abstract from *Trans. C.A.H.I.* No. 260), *J.*, XLIII., p. 915.

Wind Tunnel Investigation of Effect of Yaw on Lateral Stability Characteristics (Abstract from *N.A.C.A. Tech. Note* No. 703), *J.*, XLIII., p. 552.

AEROPLANES—STRENGTH OF

The Effect of Incomplete Partition (Ribs) on the Force Distribution in Single Spar Wings (Abstract from *L.F.F.*, 20/7/39), *J.*, XLIII., p. 720.

Effect of Wing Twist Upon Stresses Due to Bending (Abstract from *J. Aer. Sci.*, Nov., 1938), *J.*, XLIII., p. 116.

Monocoque Fuselage Circular Wing Analysis (Abstract from *J. Aeron. Sci.*, Jan., 1939), *J.*, XLIII., p. 386.

The Necessary Time and Fatigue Strength of Aircraft Wing Structure (Abstract from 1938 *Year Book of German Aeronautical Research*), *J.*, XLIII., p. **549**.

Some Structural Problems Pertaining to Pressurised Fuselages (Abstract from *J., Aeron. Sci.*, June, 1939), *J.*, XLIII., p. **634**.

Stress Analysis for Leading Edge Wing Spars (Abstract from *J.S.A.E.*, April, 1939), *J.*, XLIII., p. **482**.

AEROPLANES—UNDERCARRIAGES

Effective Loads on Undercarriage (Abstract from *Trans. C.A.H.I.* No. 269), *J.*, XLIII., p. **915**.

AILERONS, *see* Aerofoils, Ailerons.

AIR FORCES, *see* Aeroplanes, Military.

AIR RAID PRECAUTIONS, *see* Bombs and Ballistics; Warfare, Aerial; A.R.P.

AIRSHIPS

The Centenary of the Birth of Count Zeppelin (Abstract from *Luftwissen*, July, 1938), *J.*, XLIII., p. **377**.

Electrical Equipment of the Airship LZ 130 (Abstract from *E.T.Z.*, **16**/2/**39**), *J.*, XLIII., p. **325**.

Heavy Current Installation of the Airship Graf Zeppelin (Abstract from *Metro-Vickers Tech. News Bulletin* No. **662**), *J.*, XLIII., p. **565**.

AIRSCREWS

The Aerodynamic Characteristics of Full-Scale Propellers having 2, 3 and 4 Blades of Clark Y and R.A.F. 6 Sections (Abstract from *N.A.C.A. Report* No. **640**), *J.*, XLIII., p. **374**.

The Aerodynamic Characteristics of Four Full-Scale Propellers having Different Plan Forms (Abstract from *N.A.C.A. Report* No. **643**), *J.*, XLIII., p. **109**.

The Aerodynamic Characteristics of Six Full-Scale Propellers having Different Aerofoil Sections (Abstract from *N.A.C.A. Report* No. **650**), *J.*, XLIII., p. **913**.

The Argus Variable Pitch Propeller (Abstract from *Flugsport*, **7**/12/**38**), *J.*, XLIII., p. **111**.

Calculation of the Induced Efficiency of Heavily Loaded Propellers having Infinite Number of Blades (Abstract from *L.F.F.*, **6**/7/**38**), *J.*, XLIII., p. **376**.

Calculation of Stresses and Natural Frequencies for a Rotating Propeller Blade Vibrating Flexurally (Abstract from *J. of Res. Bureau of Standards*, Nov., 1938), *J.*, XLIII., p. **118**.

De Havilland V.P. Airscrew, Part II (Abstract from *Machinery*, **1**/**6**/**39**), *J.*, XLIII., p. **633**.

The Design of Jet Pumps (Injectors and Ejectors) (Abstract from *Forschungsheft*, March-April, 1939), *J.*, XLIII., p. 476.
Effect of Transition to Cross-Sectional Shape on the Development of the Velocity and Pressure Distribution of Turbulent Flow in Pipes (Abstract from *Forschungsheft*, March-April, 1939), *J.*, XLIII., p. 412.
Detection of Turbulence of a Liquid by Means of Polarisation (Abstract from *Ind. and Eng. Chem.*, June, 1939), *J.*, XLIII., p. 647.
Experimental Investigation of the Translatory Motion of Vortex Rings in a Real Fluid (Abstract from *Ann. der Physik*, July, 1939), *J.*, XLIII., p. 718.
Flow Phenomena at Nozzles and Orifices (Abstract from *Forschung*, March-April, 1939), *J.*, XLIII., p. 476.
Fluid Resistance in Pipes (Abstract from *Ind. and Eng. Chem.*, April, 1939), *J.*, XLIII., p. 472.
Hydrodynamic Forces on an Accelerated Cylinder Moving in Two Dimensions (Abstract from *Phil. Mag.*, Feb., 1939), *J.*, XLIII., p. 313.
Oscillating Motion of a Fluid along a Circular Tube (Abstract from *Proc. Roy. Soc.*, Series A, Vol. 168, No. 934), *J.*, XLIII., p. 38.
Russian Experiments with Under-water Wings for Ship Propulsion (Abstract from *Soudostroienie*, No. 7, 1938), *J.*, XLIII., p. 548.
Some Applications of Conformal Representations to Hydrodynamics (Abstract from *Proc. Joukovsky Academy of Military Aeronautics*, 1935, No. 13), *J.*, XLIII., p. 230.
The Two-Dimensional Hydrodynamical Theory of Moving Aerofoils (III) (Abstract from *Proc. Roy. Soc.*, 3/8/39), *J.*, XLIII., p. 719.

ICE FORMATION ON AIRCRAFT, *see* De-Icing.

INSTRUMENTS

Aircraft Rate of Climb Indicators (Abstract from *N.A.C.A. Tech. Report* No. 666), *J.*, XLIII., p. 930.
Air Line Power Control with a Torque Meter (Abstract from *J.S.A.E.*, April, 1939), *J.*, XLIII., p. 485.
Altitude Effects on an Uncompensated Rate of Climb Meter (Abstract from *J. Aeron. Sci.*, June, 1939), *J.*, XLIII., p. 643.
The Application of Thermostatic Bi-metals (Abstract from *Mech. World*, 7/4/39), *J.*, XLIII., p. 485.
Autosyn Application for Remote Indication of Aircraft Instruments (Abstract from *J. Aeron. Sci.*, Sept., 1939), *J.*, XLIII., p. 931.
Bronzavia Tail Drift Sight (Abstract from *Flight*, 8/12/38), *J.*, XLIII., p. 44.
Constant Speed Control Theory (Abstract from *J. Aeron. Sci.*, Feb., 1939), *J.*, XLIII., p. 381.
The Constitution and Application of Thermo-Electric Instruments (Abstract from *Eng. and Boiler-House Review*, July, 1938), *J.*, XLIII., p. 727.
Correlation of Aircraft and Ground Station Altimeters (Abstract from *J. Aeron. Sci.*, April, 1939), *J.*, XLIII., p. 486.
Corrosion on Electrical Measuring Instruments (Abstract from *E.T.Z.*, 25/5/39), *J.*, XLIII., p. 642.
Development in the Measurement of Air Flow in Mines (Abstract from *Engineering*, 11/8/39), *J.*, XLIII., p. 931.
On the Effect of the Density of the Air Upon the Pitot Static Tube Coefficient (Abstract from *Aeron. Research Inst., Tokio, Report* No. 173), *J.*, XLIII., p. 382.
Effect of Pulsations on Orifice Meters (Abstract from *Trans. A.S.M.E.*, May, 1939), *J.*, XLIII., p. 642.
Electric CO_2 Meter with Bar-Shaped Heating Elements (Abstract from *A. E. G. Mitt*, Dec., 1938), *J.*, XLIII., p. 120.
An Electro-Magnetic Indicator and Knock Meter (Abstract from *Year Book of German Aeronautical Research*, 1938), *J.*, XLIII., p. 641.
Fine Measuring Appliances (Abstract from *Maschinenbau*, May, 1939), *J.*, XLIII., p. 1008.
Friction Wheels for Instrument Work (Abstract from *Z.V.D.I.*, 3/6/39), *J.*, XLIII., p. 1008.
Instantaneous Fluid Pressure Recording Equipment (Abstract from *Engineering*, 4/8/39), *J.*, XLIII., p. 931.
An Instrument for the Measurement of Anomalous Viscosity (Abstract from *J. Sci. Inst.*, Jan., 1939), *J.*, XLIII., p. 240.
Librascope Power Computor (Abstract from *Aero Digest*, Oct., 1939), *J.*, XLIII., p. 1008.
Liquid Level Control and Distant Indicators (Abstract from *El. Engineer*, 25/8/39), *J.*, XLIII., p. 931.
Measuring Instruments (Abstract from *Electrician*, 28/10/38), *J.*, XLIII., p. 44.
A Method for Indicating Speeds of Rotation (Abstract from *J. Sci. Inst.*, May, 1939), *J.*, XLIII., p. 563.
New Automatic Direction Finder (Sperry R.C.A.) (Abstract from *American Aviation*, 1/11/38), *J.*, XLIII., p. 45.
New Methods of Measuring Liquids (Abstract from *Metro-Vickers Tech. News Bulletin*, No. 643), *J.*, XLIII., p. 240.

New Types of Heat Treating and Process Control Apparatus (Abstract from *Iron Age*, 3/8/39), *J.*, XLIII., p. 928.
Notes on the Dynamics of Electrical Measuring Instruments (Abstract from *G.E. Review*, July, 1939), *J.*, XLIII., p. 931.
Pressure Responsive Elements (Abstract from *Transactions A.S.M.E.*, Nov., 1938), *J.*, XLIII., p. 44.
Pressure Type Thermometer Systems (Abstract from *Transactions A.S.M.E.*, Nov., 1938), *J.*, XLIII., p. 45.
Pulsating Air Velocity Measurements (Abstract from *Trans. A.S.M.E.*, May, 1939), *J.*, XLIII., p. 642.
The Riken Explosive Gas Indicator (Abstract from *J. Inst. Petrol. Techn.*, July, 1939), *J.*, XLIII., p. 930.
Some Notes on the Schuler Principle—the 84 Minutes Pendulum (Abstract from *Z.A.M.M.*, June, 1939), *J.*, XLIII., p. 643.
Static Pressure Recorder (Abstract from *G.R.A. Note Tech.*, No. 1, Jan., 1939), *J.*, XLIII., p. 381.
A Terrain Clearance Indicator (Abstract from *J. Aeron. Sci.*, Feb., 1939), *J.*, XLIII., p. 388.
The Theory of Diaphragm Pressure Recorders (Abstract from *Forschung*, March-April, 1939), *J.*, XLIII., p. 486.
Torque Meter for Aircraft Models Fitted with Propellers (Abstract from *Pub. Sci. et Tech., B.S.T.*, No. 84, 1939), *J.*, XLIII., p. 382.
The Vectorscope (Abstract from *Trans. A.S.M.E.*, July, 1939), *J.*, XLIII., p. 728.
Viscous Flow Air Meters (Abstract from *The Engineer*, 30/12/38), *J.*, XLIII., p. 120.

ITALIAN AIRCRAFT, *see* Aeroplanes, Military.

LE COEUVRE, MONS. R.

The Use of Light Alloys in Aircraft Construction, *J.*, XLIII., p. 289.

Standardisation of the Luminous Transmission Scale Used in the Specification of Railroad Signal Glasses (Abstract from *Bur. Stan. J. Res.*, June, 1939), *J.*, XLIII., p. 647.

Superfinish (Abstract from *Machinist*, 5/8/39), *J.*, XLIII., p. 929.

The Working of Wrought Copper and Brass (Abstract from *Machinist*, 21/1/39), *J.*, XLIII., p. 241.

MATERIALS—ALUMINIUM

The Anodic Oxidation of Aluminium (Abstract from *J. Inst. Met.*, July, 1939), *J.*, XLIII., p. 923.

Some Aspects of the Mechanical Properties, Uses and Manipulation of Aluminium Alloys, by F. R. C. Smith, *J.*, XLIII., p. 1.

MATERIALS—CORROSION

Cladding with Ultra Pure Aluminium (Abstract from *Year Book of German Aeronautical Research*, 1938), *J.*, XLIII., p. 559.

Combating Corrosion in Design and Construction (Abstract from *J. Aeron. Sci.*, March, 1939), *J.*, XLIII., p. 386.

The Effect of Continuous Weathering on Light Metal Alloys Used in Aircraft (Abstract from *N.A.C.A. Report* No. 663), *J.*, XLIII., p. 731.

Frettage Corrosion (Abstract from *Autom. Eng.*, Aug., 1938), *J.*, XLIII., p. 48.

An Investigation of the Fretting Corrosion of Closely Fitting Surfaces (Abstract from *Proc. Inst. Mech. Eng.*, May, 1939), *J.*, XLIII., p. 1003.

Measurement of the Thickness of Metal Plates from One Side (Abstract from *J. Inst. Elec. Eng.*, Jan., 1939), *J.*, XLIII., p. 381.

Metallic Coatings and Their Corrosion Resistance (Part I) (Abstract from *Metal Industry*, 28/7/39), *J.*, XLIII., p. 923.

Metallic Coatings and Their Corrosion Resistance (Part II) (Abstract from *Met. Ind.*, 25/8/39), *J.*, XLIII., p. 924.

Some Corrosion Problems Relating to Modern Aircraft, by A. J. Sidery, Assoc.Met (Sheff.), A.F.R.Ae.S., and J. W. W. Willstrop, B.Sc., A.I.C., *J.*, XLIII., p. 606.

Some Corrosion Problems Relating to Modern Aircraft (Abstract from *J.R.Ae.S.*, Aug., 1939), *J.*, XLIII., p. 924.

MATERIALS—FRICTION

Area of Contact Between Stationary and between Moving Surfaces (Abstract from *Proc. Roy. Soc.*, No. 938), *J.*, XLIII., p. 244.

The Friction of Clean Metals and the Influence of Adsorbed Gases. The Temperature Coefficient of Friction (Abstract from *Proc. Roy. Soc.*, 3/8/39), *J.*, XLIII., p. 730.

The Mechanism of Sliding on Ice and Snow (Abstract from *Proc. Roy. Soc.*, 3/8/39), *J.*, XLIII., p. 730.

The Nature of Sliding and the Analysis of Friction (Abstract from *Proc. Roy. Soc.*, No. 938), *J.*, XLIII., p. 244.

A Note on the Nature of Sliding Friction (Abstract from *Phil. Mag.*, June, 1939), *J.*, XLIII., p. 644.

MATERIALS—LIGHT ALLOYS

The Column Strength of Two Extruded Aluminium Alloy H Sections (Abstract from *N.A.C.A. Tech. Report* No. 656), *J.*, XLIII., p. 729.

Combined Beam-Column Stresses of Aluminium Alloy Channel Sections (Abstract from *N.A.C.A. Tech. Note* No. 726), *J.*, XLIII., p. 1003.

The Deep Drawing of Light Alloys for Aircraft Construction (Abstract from *Luftwissen*, July, 1938), *J.*, XLIII., p. 385.

Dynamic Strength Characteristics of Light Alloys at Low Temperatures (Abstract from *Year Book of German Aeronautical Research*, 1938), *J.*, XLIII., p. 558.

The Effect of Cu, Mg and Si Content on the Properties of Al-Cu-Mg Alloys (Abstract from *Year Book of German Aeronautical Research*, 1938), *J.*, XLIII., p. 559.

Effect of Service Stresses on Impact Resistance, X-Ray Diffraction Patterns, and Micro-Structure of 25S Aluminium Alloy (Abstract from *N.A.C.A. Report* No. 639), *J.*, XLIII., p. 922.

The Intercrystalline Corrosion of Some Aluminium Alloys (Abstract from *Engineer*, 24/3/39), *J.*, XLIII., p. 384.

Thermal and Electrical Conductivities of Some Magnesium Alloys (Abstract from *Phil. Mag.*, June, 1939), *J.*, XLIII., p. 644.

Torsional Stability of Aluminium Alloy Seamless Tubing (Abstract from *N.A.C.A. Tech. Note* No. 696), *J.*, XLIII., p. 483.

The Use of Light Alloys in Aircraft Construction, by Mons. R. Le Coeuvre, *J.*, XLIII., p. 289.

MATERIALS—PLASTICS

Application and Testing of Transparent Plastics Used in Aircraft Construction (Abstract from *Luftwissen*, June, 1938), *J.*, XLIII., p. 241.

Creep, Elastic Hysteresis and Damping in Bakelite Under Torsion (Abstract from *J. App. Mech.*, June, 1939), *J.*, XLIII., p. 645.

Physical Properties of Synthetic Resin Materials (Abstract from *N.A.C.A. Tech. Note* No. 694), *J.*, XLIII., p. 482.

Resistance of Transparent Plastics to Impact (Abstract from *N.A.C.A. Tech. Note* No. 718), *J.*, XLIII., p. 731.

Synthetic Resin Moulded Material for Guide Ways on Heavy Machine Tools (Abstract from *Maschinenbau*, Oct., 1938), *J.*, XLIII., p. 47.

MATERIALS—RIVETING

Flush Riveting—Considerations for Quantity Production (Abstract from *Aero Digest*, May, 1939), *J.*, XLIII., p. 559.

Fully Automatic Riveting in Light Metal Aircraft Construction (Abstract from *Inter. Avia.*, No. 638, April, 1939), *J.*, XLIII., p. 484.

New Developments in the Riveting and Welding of Light Alloys (Abstract from *Z. Metallk.*, May, 1939), *J.*, XLIII., p. 561.

Riveting Machines and Light Alloy Rivets (Abstract from *Light Metals*, April, 1939), *J.*, XLIII., p. 484.

Slow Ageing Light Alloys and their Use as Riveting Materials (Abstract from *Year Book of German Aeronautical Research*, 1938), *J.*, XLIII., p. 558.

MATERIALS—STEEL

Alloy Steel Containing Lead (Abstract from *Mech. World and Eng. Record*, 3/3/39), *J.*, XLIII., p. 324.

The Effect of the Speed of Stretching and the Rate of Loading in the Yielding of Mild Steel (Abstract from *J. Applied Mech.*, Dec., 1938), *J.*, XLIII., p. 117.

Fatigue and Corrosion Fatigue of Steels (Abstract from *Mech. Eng.*, Nov., 1938), *J.*, XLIII., p. 47.

Stainless Steel Welding (Abstract from *Sheet Met. Ind.*, Nov., 1938), *J.*, XLIII., p. 46.

The Working of Stainless Steels (Abstract from *Machinist L.*, 5/11/38), *J.*, XLIII., p. 46.

MATERIALS—STRENGTH OF

Calculation of Stresses Within the Boundary of Photo-Elastic Models (Abstract from *J. App. Mech.*, June, 1939), *J.*, XLIII., p. 645.

Creep of Metals (Abstract from *Metal Treatment*, Autumn, 1939), *J.*, XLIII., p. 1007.

Distortion of a Curved Tube due to Internal Pressure (Abstract from *Phil. Mag.*, Oct., 1939), *J.*, XLIII., p. 1004.

The Elastic Theory of Wood Failure (Abstract from *A.S.M.E.*, April, 1939), *J.*, XLIII., p. 484.

The Equilibrium and Oscillation of Rods under Torsion (Abstract from *C.A.H.I. Report* No. 341), *J.*, XLIII., p. 323.

Experiments with D.V.L. Bearing Testing Machine on Lead-Bronze Bearings Cast on Steel Shells (Abstract from *L.F.F.*, 20/7/39), *J.*, XLIII., p. 729.

Fatigue Machines for Testing Structural Units (Abstract from *Amer. Soc. Test. Mater.*, June, 1939), *J.*, XLIII., p. 1003.

The Fundamentals of Stress Optical Experiments (Abstract from *Trans. C.A.H.I.*, No. 270), *J.*, XLIII., p. 926.

Fundamentals of Three-Dimensional Photo-Elasticity (Abstract from *J. App. Mech.*, Dec., 1938), *J.*, XLIII., p. 117.

Heterostatic Loading and Critical Astatic Loads (Abstract from *Bur. Stan. J. Res.*, Jan., 1939), *J.*, XLIII., p. 323.

Impact Bending Force Produced by Distributed Load (Abstract from *C.A.H.I. Report* No. 351), *J.*, XLIII., p. 323.

The Influence of Internal Stresses on the Resistance of Metal to Cutting and Wear (Abstract from *Machinery*, 23/3/39), *J.*, XLIII., p. 385.

Is There a True Creep Limit? (Abstract from *Z. fur Metallk.*, June, 1939), *J.*, XLIII., p. 1002.

Local Instability of Centrally Loaded Columns of Channel Section or Z Section (Abstract from *N.A.C.A. Tech. Note* No. 722), *J.*, XLIII., p. 925.

Local Instability of Symmetrical Rectangular Tubes under Axial Compression (Abstract from *N.A.C.A. Tech. Note* No. 686), *J.*, XLIII., p. 384.

Magnitude of the Direct Stress in a Beam of Fixed Span (Abstract from *Phil. Mag.*, Oct., 1939), *J.*, XLIII., p. 1005.

On the Luders-Hartman Lines of Slip at the Yield Point (Abstract from *Z.A.M.M.*, Dec., 1938), *J.*, XLIII., p. 242.

A Method of Calculating Energy Losses during Impact (Abstract from *J. App. Mech.*, June, 1939), *J.*, XLIII., p. 645.

A Method of Determining End Fixity (Abstract from *J. Aeron. Sci.*, May, 1939), *J.*, XLIII., p. 562.

A Method of Estimating the Critical Buckling Load of Structural Members (Abstract from *N.A.C.A. Tech. Note* No. 717), *J.*, XLIII., p. 731.

New Photo-Elastic Method for Three-Dimensional Stress Investigations (Abstract from *Mech. Eng.*, June, 1939), *J.*, XLIII., p. 561.

Note on Recent Structural Research at Goodyear-Zeppelin Corporation (Abstract from *J. Aeron. Sci.*, Oct., 1939), *J.*, XLIII., p. 1005.

Numerical and Graphical Method of Solving Two-Dimensional Stress Problems (Abstract from *J. App. Mech.*, June, 1939), *J.*, XLIII., p. 645.

The Relations Between the Energy Theorems Applicable in Structure Theory (Abstract from *Phil. Mag.*, Nov., 1938), *J.*, XLIII., p. 46.

Relaxation Methods Applied to Problems Relating to Elastic Stability and Vibrations (Abstract from *Proc. Roy. Soc.*, No. 938), *J.*, XLIII., p. 242.

On the Rib Stiffness Required for Box Beams (Abstract from *J. Aeron. Sci.*, May, 1939), *J.*, XLIII., p. 562.

A Semi-graphical Method for Analysing Strains Measured on Three or Four Gauge Lines Intersecting at 45° (Abstract from *N.A.C.A. Tech. Note* No. 709), *J.*, XLIII., p. 562.

Some Notes on the Numerical Solution of Shear Lag and Mathematically Related Problems (Abstract from *N.A.C.A. Tech. Note* No. 704), *J.*, XLIII., p. 561.

Stresses and Deformations in Pipe Flanges Subjected to Creep at High Temperatures (Abstract from *J. Frank. Inst.*, Nov., 1938), *J.*, XLIII., p. 49.

Surface Hardness and Type of Wear (Abstract from *Engineer*, 7/4/39), *J.*, XLIII., p. 385.

Theory of Fatigue of Metals (Abstract from *Proc. Roy. Soc.*, No. 944, 1/5/39), *J.*, XLIII., p. 560.

Tightening of Bolts (Abstract from *Maschinenbau*, April, 1939), *J.*, XLIII., p. 1010.

A Theory of Flexure for Beams with Non-Parallel Extreme Fibres (Abstract from *J. App. Mech.*, Sept., 1939), *J.*, XLIII., p. 926.

The Use of Symmetric and Anti-Symmetric Loadings (Abstract from *J. Aeron. Sci.*, April, 1939), *J.*, XLIII., p. 485.

X-Ray Determination of the Notch Factor of Notched Rods (Abstract from *Z. Metallk.*, April, 1939), *J.*, XLIII., p. 728.

X-Ray Measurement of Stress in Steel Bars Subjected to Bending Stresses Exceeding the Yield Point (Abstract from *Z.V.D.I.*, 17/9/38), *J.*, XLIII., p. 119.

MATERIALS—STRESSED SKIN

Analysis of Circular Rings for Monocoque Fuselages (Abstract from *J. Aeron. Sci.*, Sept., 1939), *J.*, XLIII., p. 927.

Analysis of Spherical Shells of Variable Wall Thickness (Abstract from *J. App. Mech.*, Sept., 1939), *J.*, XLIII., p. 926.

Approximate Stress Analysis of Multi-Stringer Beams with Shear Deformation of the Flange (Abstract from *N.A.C.A. Report* No. 636), *J.*, XLIII., p. 116.

Clamped Rectangular Plates with Centre Concentrated Load (Abstract from *J. App. Mech.*, Sept., 1939), *J.*, XLIII., p. 927.

Compressive Tests of a Monocoque Box (Abstract from *N.A.C.A. Tech. Note* No. 721), *J.*, XLIII., p. 925.

The Effective Width of Curved Sheet After Buckling (Abstract from *L.F.F.*, 6/7/38), *J.*, XLIII., p. 241.

Empirical Formulæ for Allowable Compression Loads in Stiffened Sheet Panels (Abstract from *J. Aeron. Sci.*, Oct., 1939), *J.*, XLIII., p. 1005.

Experimental Study of Deformation and Effective Width in Axially Loaded Sheet-Stringer Panels (Abstract from *N.A.C.A. Tech. Note* No. 684), *J.*, XLIII., p. 922.

Loads Imposed on Intermediate Frames of Stiffened Shells (Abstract from *N.A.C.A. Tech. Note* No. 687), *J.*, XLIII., p. 384.

Measurement of Stiffener Stresses and Effective Width in Stiffened Panels (Abstract from *J. Aeron. Sci.*, April, 1939), *J.*, XLIII., p. 485.

Stability of Rectangular Plates with Longitudinal or Transverse Stiffeners under Uniform Compression (Abstract from *N.A.C.A. Tech. Memo.*, No. 904), *J.*, XLIII., p. 923.

Stress-Optical Investigation on a Square Plate Fitted with a Central Square Hole (Abstract from *Forschung*, July-Aug., 1939), *J.*, XLIII., p. 731.

The Twisting of Thin-Walled Stiffened Circular Cylinders (Abstract from *Lilienthal Year Book*, 1936), *J.*, XLIII., p. 117.

MATERIALS—TESTING

Magnaflux—What does it Show? (Abstract from *J.S.A.E.*, Feb., 1939), *J.*, XLIII., p. 322.

Magnetic Crack Detecting on Turbine Blades and Rotors (Abstract from *Power*, Nov., 1938), *J.*, XLIII., p. 47.

The " Pack " Method for Compressive Tests of Thin Specimens of Materials Used in Thin Walled Structures (Abstract from *N.A.C.A. Report* No. 649), *J.*, XLIII., p. 560.

Testing Tensile Strength of Deposited Weld Metal (Abstract from *Metro-Vickers Tech. News Bulletin*, 28/10/38), *J.*, XLIII., p. 47.

MATERIALS—WELDING

Arc Welding, with Special Reference to the Welding of High Alloy Steels and Non-Ferrous Metals (Abstract from *Metro-Vickers Tech. News Bulletin*, No. 658), *J.*, XLIII., p. 484.

Automatic Arc Welding (Abstract from *Welder*, Aug., 1939), *J.*, XLIII., p. 929.

Automatic Arc Welding Without the Aid of Machines (Abstract from *Z.V.D.I.*, 19/8/39), *J.*, XLIII., p. 929.

Construction of Welded Structural Parts (Abstract from *Year Book of German Aeronautical Research*, 1938), *J.*, XLIII., p. 558.

Fatigue Strength of Fillet and Fusion Welded Connections (Abstract from *Zeit. Ver. deu. Ing.*, 17/9/38), *J.*, XLIII., p. 119.

Increase of the Specific Load under Tension, Compression and Buckling of Welded Steel Tubes in Aeroplane Construction (Abstract from *L.F.F.*, 10/1/39), *J.*, p. 1006.

The Manufacture of Composite Metals by Carbon Arc Welding (Abstract from *Mech. World*, 10/3/39), *J.*, XLIII., p. 383.

New Developments in the Riveting and Welding of Light Metals (Abstract from *Z. Metallk.*, May, 1939), *J.*, XLIII., p. 1009.

New Processes for Welding and Soldering Zinc, Aluminium and Magnesium (Abstract from *Z. Metallk.*, May, 1939), *J.*, XLIII., p. 1009.

Recent Welding Developments in the U.S.A. (Abstract from *Welding Ind.*, June, 1939), *J.*, XLIII., p. 728.

Some Recent Developments in Resistance Welding Equipment in America (Abstract from *Welding Industry*, March, 1939), *J.*, XLIII., p. 383.

Strip Welding (Abstract from *Steel*, 28/8/39), *J.*, XLIII., p. 927.

The Testing of Welds (Abstract from *Weld. Ind.*, Dec., 1938), *J.*, XLIII., p. 118.

Test of Welds in Alloy Steels (Abstract from *J. Am. Welding Soc.*, Sept., 1938), *J.*, XLIII., p. 118.

Welding Coated Steel (Abstract from *Welding Journal*, Feb., 1939), *J.*, XLIII., p. 323.

MATHEMATICS

Approximation to a Function of One Variable from a Set of Its Mean Value (Abstract from *Nat. Bur. of Stan., J. of Res.*, Aug., 1939), *J.*, XLIII., p. 933.

The Differential Analyser and its Applications in Electrical Engineering (Abstract from *J. Inst. Elec. Eng.*, Nov., 1938), *J.*, XLIII., p. 43.

The General Theory of Relaxation Applied to Linear Systems (Abstract from *Proc. Roy. Soc.*, No. 939, 7/3/39), *J.*, XLIII., p. 382.

Note on Lord Rayleigh's Reciprocal Theorems in Elastic Systems, J. Morris, B.A., *J.*, XLIII., p. 467.

Numerical Computation and Application of Certain Functions Related to Bessel Functions (Abstract from *Z.A.M.M.*, Feb., 1939), *J.*, XLIII., p. 327.

The Utilisation of Sound Films for Harmonic Analysis (Abstract from *Z. Instrum.*, May, 1939), *J.*, XLIII., p. 563.

MAYO, R. H., O.B.E., Assoc.M.Inst.C.E., F.R.Ae.S.

Transatlantic Air Services, *J.*, XLIII., p. 884.

MECHANICS

Calculation of Stresses in Revolving Flywheels and Rope Pulleys (Abstract from *Forschung*, July-Aug., 1938), *J.*, XLIII., p. 45.

Transverse Oscillations of Flywheels (Abstract from *Forschung*, July-Aug., 1938), *J.*, XLIII., p. 45.

METAL CONSTRUCTION, *see* Aeroplanes, Design and Construction.

METEOROLOGY

The Meteorological Problem of the North Atlantic, F. Entwistle, B.Sc., *J.*, XLIII., p. 69.

The Propagation of a Pulse in the Atmosphere (Abstract from *Proc. Roy. Soc.*, 7/7/39), *J.*, XLIII., p. 646.

METEOROLOGY—FOG

The Artificial Dissipation of Fog (Abstract from *J. Sci. Inst.*, May, 1939), *J.*, XLIII., p. 564.

Methods of Clearing Aerodromes of Fog (Abstract from *Les Ailes*, 20/4/39), *J.*, XLIII., p. 485.

MILLS, J. B., B.Sc., B.E., Grad.R.Ae.S., AND J. B. DOUGLAS

A Method for the Photographic Recording of Take-off and Landing Performance, *J.*, XLIII., p. 441.

MISCELLANEOUS

Boots' Self-Locking Aircraft Nut (Abstract from *Inter. Avia.*, 24/2/39), *J.*, XLIII., p. 327.

Rationalisation by Production Control and Inspection (Abstract from *Maschinenbau*, May, 1939), *J.*, XLIII., p. 1010.

The Spring Clutch (Abstract from *J. App. Mech.*, Sept., 1939), *J.*, XLIII., p. 933.

The Stability of a Cylindrical Shell by the Method of Integral Equations (Abstract from *C.A.H.I. Report* No. 320), *J.*, XLIII., p. 323.

The Theory of Crystal Rectifiers (Abstract from *Proc. Roy. Soc.*, No. 944, 1/5/39), *J.*, XLIII., p. 564.

MORRIS, J., B.A.

Note on Lord Rayleigh's Reciprocal Theorems in Elastic Systems, *J.*, XLIII., p. 467.

NAVY

German Naval Plans (Abstract from *Engineer*, 26/8/38), *J.*, XLIII., p. 34.

NIXON, F., B.Sc., A.F.R.Ae.S., AND R. H. CHAPLIN, B.Sc., A.F.R.Ae.S.

The Problem of Ancillary Power Services on Aircraft, *J.*, XLIII., p. 942.

NOISE, *see* Acoustics.

OPTICS

Optical Inspection in the Metal Industries (Abstract from *Eng. Prog.*, Oct., 1938), *J.*, XLIII., p. 44.

OWNER, F. M., F.R.Ae.S., AND J. E. ELLOR, F.R.Ae.S.

A Review of the Relative Merits of Petrol Injection and Carburettors for Aero Engines, *J.*, XLIII., p. 837.

PARACHUTES FOR TROOP DROPPING, *see* Warfare, Aerial.

PATENT SPECIFICATIONS

Abstracts, *J.*, XLIII., pp. 54, 391, 736.

PERFORMANCE OF AIRCRAFT, *see* Aeroplanes, Performance.

PHOTOGRAPHY

Resolving Power and Distribution of Typical Aeroplane Camera Lenses (Abstract from *Bur. Stan. J. Res.*, June, 1939), *J.*, XLIII., p. 647.

On the Simple Chromatic Photographic (Abstract from *Aero. Res. Inst., Tokio, Report* No. 178), *J.*, XLIII., p. 934.

PILOTS AND PILOTING

Insufficient Training of Russian Pilots (Abstract from *Les Ailes*, 22/9/38), *J.*, XLIII., p. 310.

The Training of Pilots in the National Socialist Flying Corps (*N.S.F.K.*) (Abstract from *Book by C. J. E. Volckmann*), *J.*, XLIII., p. 372.

PLASTICS, *see* Materials, Plastics.

PRODUCTION OF AIRCRAFT, *see* Aeroplanes, Production.

PROPELLERS, *see* Airscrews.

RAYNER, P. H.

Notes on Aero Engine Research, *J.*, XLIII., p. 19.

REPORTS

N.A.C.A. 24th Annual Report, 1938, *J.*, XLIII., p. 487.

RESEARCH

Future Development of the N.A.C.A. (Abstract from *Inter. Avia.*, 24/2/39), *J.*, XLIII., p. 327.

Some Modern Methods of Research in the Problems of Flight, G. W. Lewis, F.I.Ae.S., *J.*, XLIII., p. 770.

REVIEWS

Aerodynamics and its Practical Application for the Aeroplane, *J.*, XLIII., p. 572.

The Aero Engine, Dr. Ing. H. Katz, *J.*, XLIII., p. 287.

Aero Engines (Vol. II), Various Authors, *J.*, XLIII., p. 409.
